NIYOMWUNGERE ELVIS

ELVIS PROGRAMMER

Software Architect & Full-Stack Developer

Founder — BeYou Digital Solutions, Burundi

elvisprogrammer1@gmail.com +257 65 10 11 18 Bujumbura, Burundi

PROFESSIONAL PROFILE

Software architect and full-stack developer specializing in the design of intelligent, secure, and scalable digital systems. Founder of BeYou Digital Solutions, I design enterprise software architectures and AI-based solutions with Computer Vision to transform administrative and business processes.

PROFESSIONAL EXPERIENCE

Architect & Digital Systems Developer
February 2026 – Present

Office of the Prime Minister, Burundi

- Design and development of digital systems for the digitization of administrative and financial processes
- Analysis of functional and technical requirements and design of software architectures adapted to institutional requirements
- Development and integration of business features, validation workflows, user management, roles and permissions
- Design and management of databases and data processing and security mechanisms
- Deployment, maintenance and continuous improvement of applications and their technical infrastructure

Founder & Lead Developer
October 2025

BeYou Digital Solutions, Burundi

- Design and development of enterprise software architectures for multi-user, multi-tenant and multi-sector systems
- Backend development with PHP/Laravel and Python/FastAPI, modern interfaces with React/Next.js, Vue.js
- Design and integration of AI-based solutions and Computer Vision (YOLO, OCR, ANPR/LPR)
- Development of AI platforms integrating model management, versions, deployments, inferences and monitoring
- Deployment and administration of Linux/Ubuntu Server, Nginx and application service environments

Full-Stack Developer
April 2024 – September 2025

Freelance

- Complete development of Web and Mobile applications
- Design of secure architectures
- Management of relational and NoSQL databases
- Performance optimization and application security reinforcement

Web & Mobile Developer
May 2023 – March 2024

Freelance

- Design and development of professional websites (showcase site, online store, portfolios)
- Development of dynamic web applications
- API integration and database management
- Direct collaboration with clients (requirements analysis, maintenance)

Intensive self-training in Web & Mobile Development

Year 2022

- Continuous self-training via international professional platforms
- Realization of practical projects (web applications, APIs, mobile applications)
- Acquisition of software security skills

Academic Intern

April 2021

ARCT — Telecommunications Regulation and Control Agency

- Discovery of institutional information systems
- Initiation to ICT infrastructures
- Technical assistance and participation in internal IT activities

TECHNICAL SKILLS

Software Architecture & Enterprise Systems

Multi-tenant, Microservices, Design Patterns, UML

Backend Development & APIs

PHP, Laravel, Python, FastAPI, REST APIs, JWT, OAuth 2.0

Artificial Intelligence & Computer Vision

YOLO/YOLOv8, OCR, ANPR/LPR, Video Analytics, Model Deployment

Frontend Development

React, Next.js, Vue.js, TypeScript, Tailwind CSS, Bootstrap

Databases

PostgreSQL, MySQL, NoSQL, Data Modeling, ACID

Cybersecurity

RBAC, MFA, OAuth 2.0, JWT, OWASP, Audit

Infrastructure & Deployment

Linux, Ubuntu Server, Nginx, HTTPS/TLS, Docker

Real-time & Integration

WebSockets, API Integration, Event-driven systems

DevOps & Quality

Git, Version Control, Testing, Documentation

Methodology

Requirements Analysis, Architecture Design, Technical Coordination

SELECTED PROJECTS

SMARTVISIONLAB

Featured Project

Artificial Intelligence & Computer Vision Platform

- Multi-tenant and multi-organizational architecture with complete AI model lifecycle management
- Computer Vision: object detection, OCR, ANPR/LPR, video analysis
- Camera management and video streams, real-time events via WebSocket
- Operational intelligence dashboards, security, RBAC, audit

BEYOU NEXUS

Multi-Sector SaaS

Modular SaaS architecture for Education, Banking, Enterprise, Hospitals, Agriculture. Data centralization, advanced user management, multi-tenant isolation.

PORTAIX

Smart Port & Intelligent Port Management

Digital solution for the digital transformation of port operations. Intelligent vehicle and cargo management, automated control via ANPR/LPR, OCR, intelligent weighing.

GovTech eCivilBurundi & eID

GovTech R&D

Research and design work on digital solutions for civil status, biometric identity, interoperability between institutions, institutional service APIs.

EDUCATION

University of Burundi

2023 – Present

Faculty of ICT — Computer Science • Year 3

ETS Kamenge

2018 – 2021

A2 Diploma

ECOFO Mirango 2

2016 – 2018

Common Core Certificate

Bugarama Communal High School

2015 – 2016

Report Card

Bugarama Primary School

2009 – 2015

Primary School Leaving Certificate

CERTIFICATIONS & INTERNATIONAL TRAINING

Advanced Seminar on Earth Observation Data Policies and Applications

for the Countries along the "Belt & Road Initiative"

CN China — Certificate of participation

China International Supply Chain Expo (CISCE) – 4th Edition

CN China — Participation
